Rocks, Boulders, Debris

Hydraulic powered rock and debris picker -
Makes clearing rocks, boulders, stumps and debris a snap.

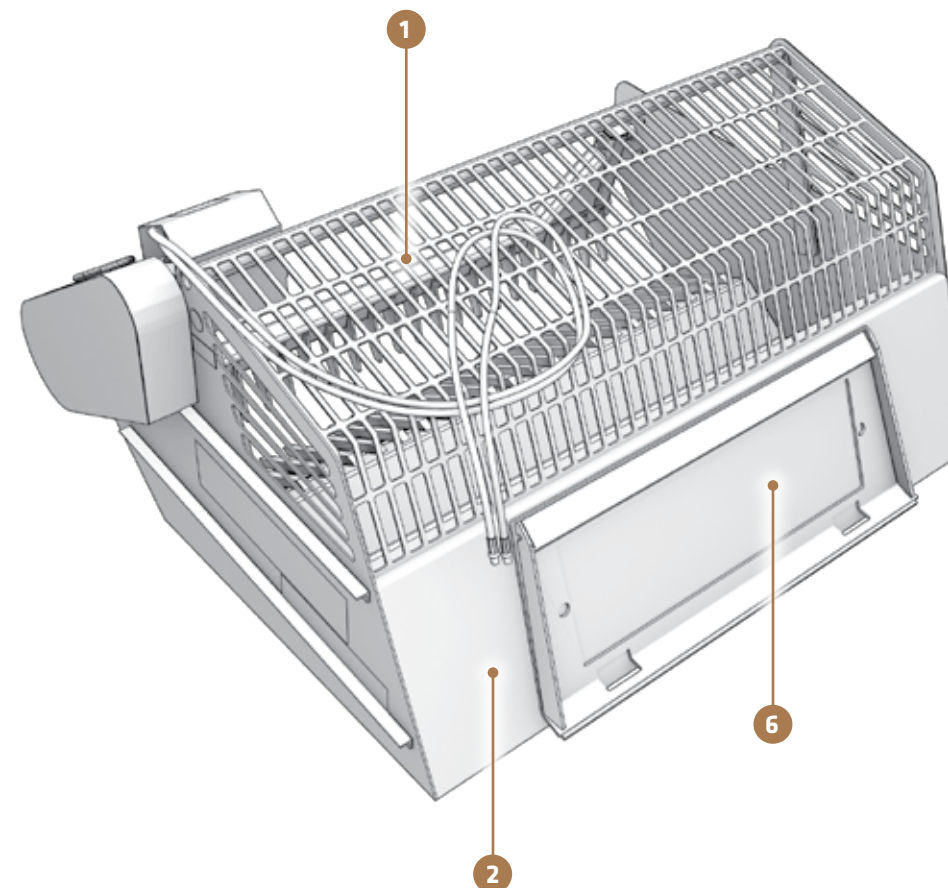

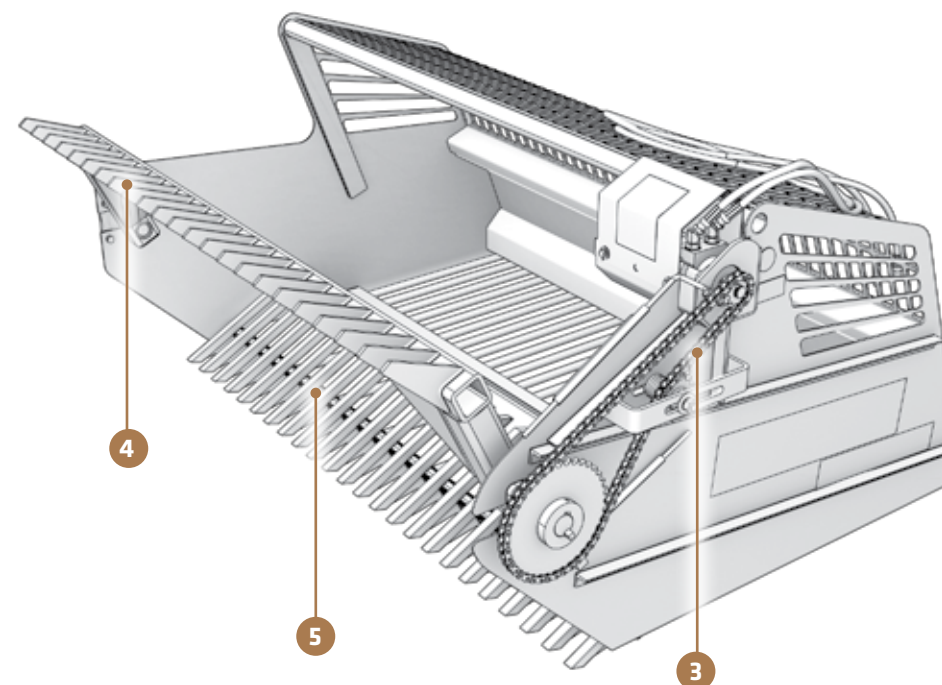

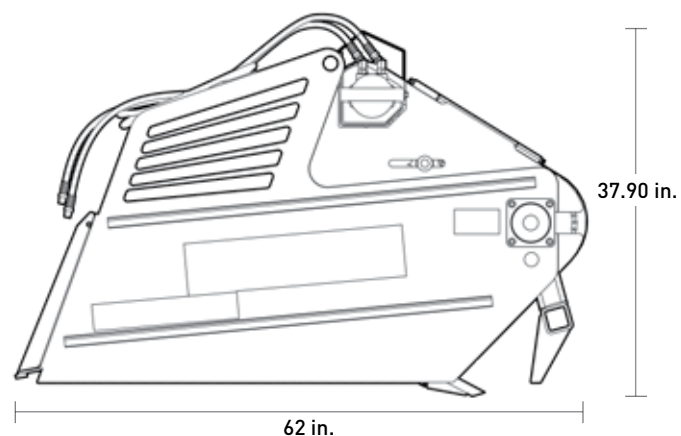

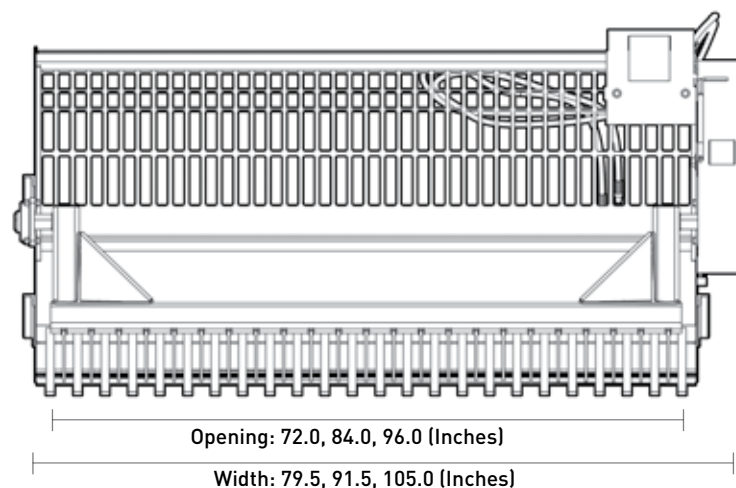

Never pick up rocks by hand again.

Put the Loftness Kwik Pik attachment to work, and you'll be amazed at how fast you'll move, clear and sort rocks from your farm or job site. This patented attachment will remove rocks as small as 2 inches, or as large as 2 feet in diameter. That's one of the widest ranges in the industry.

With its 1 inch thick high carbon steel tines and hydraulic powered reel that rotates 360 degrees, Kwik Pik outworks the competition in picking up concrete, rubble, wood and other general debris quickly, easily. That saves you time and money for better payback on your equipment investment. And like all the commercial equipment from Loftness, Kwik Pik is engineered to industry-leading standards, with heavy duty features to handle the toughest jobs.
