## // The Best Way to Dig a Ditch

Improve drainage in ditches, fields and many other applications with the Loftness Ditcher. Heavy-duty construction, easy operation and adjustable performance make Loftness a superior choice for water control.

## // DITCHER FEATURES

### **Adjustable Skid Shoes:**

The skid shoes allow the cutting depth to be adjusted up to 12 inches deep. A ratchet link provides easy and precise adjustment.

### **Adjustable Impeller Blades:**

The impeller blades are adjustable, allowing you to dig 18- or 20-inch-wide ditches. The blades are also reversible to double the service life before replacement is needed.

### **30-Foot Spread Distance:**

The powerful impellers are capable of spreading soil up to 30-foot (9.1 m) distances.

### **Point Shank:**

A point shank breaks up soil ahead of the impeller. It is designed for running in hard or rocky conditions.

### **Belt Drive:**

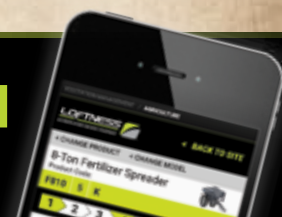

A 5-band belt drive with taper-lock sheaves provides reliable, efficient transfer of power from the tractor to the impeller. The belt has a spring tensioner with an easy nut adjustment.

### **Jack Stands:**

The included jack stands allow the Ditcher to be easily hooked up and disconnected.
