» DISC MULCHER

LOFTNESS

BAD AX®

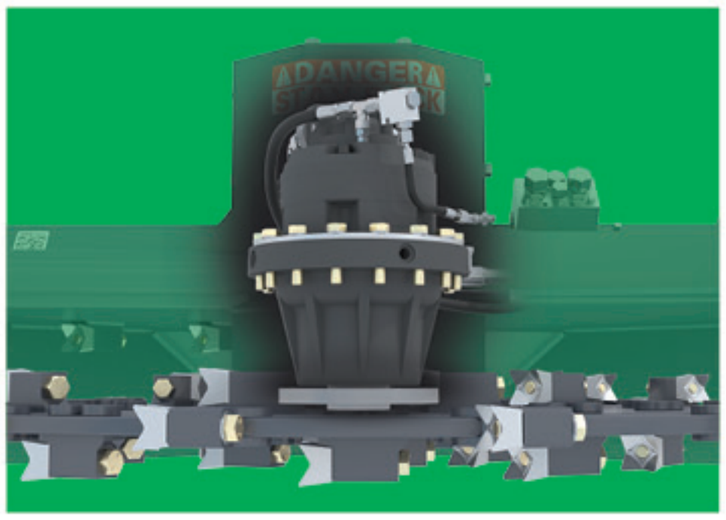

2 YEAR WARRANTY

Proudly American.

Explore all Features

PURE DIRECT DRIVE POWER

Forget about high-maintenance pulleys or slipping belts. Our Bad Ax® rocks a pure direct drive system. That means 100% of the hydraulic motor's power goes straight to the cutting disc, giving you raw, uninterrupted mulching force without the fuss. Less downtime and greater performance — plain and simple.

14" TREE CUTTING CAPACITY

NO SIGNS OF WEAKNESS

FULLY MACHINED DISC

We went all-in on durability. The Bad Ax features a robust 60-inch-diameter disc, 1.25 inches thick, made from premium-strength steel. It's fully machined with absolutely no welds on the disc itself. That means zero weak points for stress cracking, so this disc can handle whatever you throw at it, day in and day out.

CUTS TREES DOWN TO SIZE

RECUTTER BAR

The cleaner the site, the better. That's why we gave the Bad Ax a recutter bar with stationary counter teeth to hold material in place while mulching. This unique design cuts material into finer particles, which means faster decomposition and a nicer-looking end product. Even better, it practically eliminates log jams in the chamber, which can be a major headache with other disc mulchers.

STAY IN CONTROL, ALWAYS

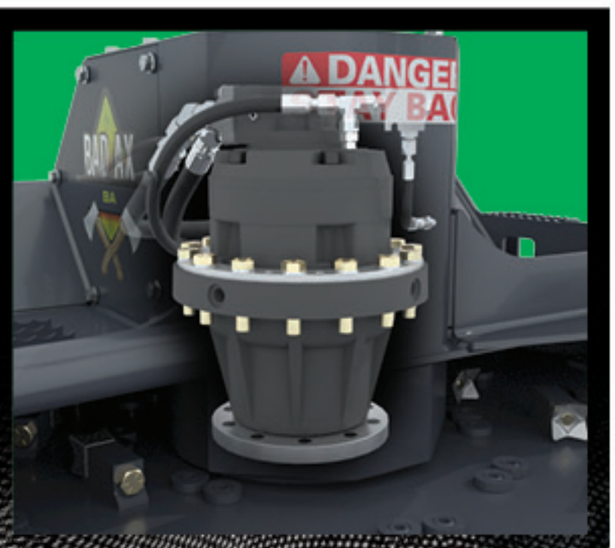

PARALLEL SIDE HOUSING Ever had a mulcher fight you when hitting a stump or hidden root? Not with the Bad Ax. Our parallel side housing design keeps you squarely in charge, providing optimal control without those unpredictable shifts from funnel or V-shaped disc mulchers. The Bad Ax stays stable so you can keep mulching.

HOUSING DESIGN Our exclusive housing design optimizes the material feed into the machine for superior performance. It works well when dealing with some of the most challenging trees, like cedar.

RADIAL PISTON MOTOR

A radial piston high-pressure motor offers 175cc of tree-shredding power. It provides instant torque at start-up, providing fast recovery times and helping you work faster in trees up to 14 inches in diameter.

BOLT-ON TEETH

QUADCO 4-POINT BEAVER TEETH

Constructed of heat-treated steel, the Quadco beaver teeth are reversible for extended service life. The pointed design aids in performance and helps pick up material from the ground. Plus, the teeth attach to the disc with simple bolt-on mounts, making them super easy to rotate or replace on the jobsite. No cutting, welding or rebalancing needed.

RIGID DISCHARGE DEFLECTOR

We've got your back (and your power unit). Our rigid discharge deflector directs shredded material down and away, keeping you and your equipment safer.

» *The shape of the housing allows you to* ***mulch down to ground level.***

» *An adjustable* ***tree pusher bar*** *simplifies material positioning.*

» *The center of gravity is placed close to the skid steer for a* ***well-balanced design*** *and more stable operation.*

» *Easily monitor machine performance through the* ***on-board instrumentation****.*

» *The Bad Ax uses* ***anti-wrap bearing protection*** *to prevent material from entering the bearing chamber.*

» *An integrated* ***anti-cavitation shutdown circuit*** *helps protect the motor during shutdown.*

2 YEAR WARRANTY

The Bad Ax® comes standard with an industry-leading 2-year warranty.

SPECIFICATIONS

Model	*60BA*
Cutting Width	60" (1.52 M)
Overall Width	67" (1.70 M)
Number Of Teeth	44
Weight	2,643 Lbs (1,199 Kg)
Crated Weight	2,793 Lbs (1,267 Kg)
Hydraulic Flow Range	36-50 GPM
Max Hydraulic Pressure	5,000 PSI
Radial Piston Motor Displacement	175 CC
Hydraulic Horsepower Range	70-120
Disc Speed	Up To 1,100 RPM
Tip Speed	200+ MPH (321.9 KPH)

DURABILITY RUNS DEEP WITH OUR FULL LINE OF EQUIPMENT

2 YEAR WARRANTY

MULCHING HEADS » BRUSH CUTTERS » DISC MULCHERS » FLAIL MOWERS » STUMP GRINDERS
TREE SAWS » HYDRAULIC COOLERS » MECHANICAL TRIMMERS » STONE CRUSHERS
